

Red Range Farm ~ Heritage Breeder/Herd ~ Crossing Baylis, Smoke Ridge, Syfan, Valera

Our herd of Spanish Goats are from the bloodlines of: Smoke Ridge, Valera, Syfan and Baylis. These bloodlines bring outstanding qualities: hardiness, rugged, and the ability to sustain difficult environments. Does are paired off with specific breeding bucks to insure of no inline breeding. They are prolific, and have great maternal instincts. Our kidding takes place early spring and is done unassisted in open pasture. Rotating pastures is on the top of our priority list, providing the best nature has to offer. We do however offer free choice of loose minerals and salt blocks to insure the goats are getting everything they require for essential good health. We do not use medicated feed or administer artificial hormones to any of our goats.
